

XM Satelite radio is the greatest listening device ever. I had it on my new car (Honda) which I purchased April 1. I am never without it while driving. There is nowhere else you can find the range of programming that XM gives. I am going to be making a long trip by car this summer, probably 3,000 miles, and I look forward to be able to check weather, news, sports stories and my favorite jazz anyplace I drive. Don't let lobbyists and other power groups take XM Satelite radio away!!!
